

1. Explain uses of ping commands in Networks?

* Ping is used to check whether one device can communicate with another device

ex: System 1 that IP is 50.0.0.10

System 2 that IP is 50.0.0.20.

Command:

Ping 50.0.0.20

2. NetBIOS protocol?

* NetBIOS is an older networking interface/protocol used mainly in Windows networks.

3. SMB Protocol.

* SMB is a protocol used to share file, folder, printers and other network devices resources between Computer.

* Explain ping process 50.0.0.10 to 50.0.0.20.

* I have two PC that two pc, I have assign each pc in each IP address one is 50.0.0.10 and another one is 50.0.0.20. Then open run the command prompt type the command ping 50.0.0.10 in PC 2, the PC 1 to type ping 50.0.0.20.
